Marcin Franc – Entrepreneur

Marcin Franc is both entrepreneur and early stage investor with more than ten years of practical experience in the ICT industry (gathered among others in TomTom corporation as manager responsible for optimizing the software development processes and coordinating geographically dispersed engineering teams). He's the effective team leader, enthusiast of technology, as well as PhD candidate in the domain of Computer Science. Marcin's primary activities are related with connecting the dots between business and technology, mentoring startups, teaching people about agile project management methodologies as well as lean software development processes (he's a certified expert in those domains).

Marcin believes that passion is the key factor in the software development process. In 2011 he gathered a group of young engineers to prove that unexperienced but devoted team can achieve outstanding results (provided with the appropriate training and support).
